Top Quality, Top Size Bulbs
Flower Bulb Specialists Since 1868

Dear Garden Enthusiast,

We are delighted to bring you the new de Jager 2026 Autumn Catalogue, offering over 600 bulbs to brighten your garden next spring, including almost 70 varieties which are new or reintroduced.

At de Jager, we have specialised in supplying top-quality, top-sized bulbs for 158 years, with a range now extending to hundreds of varieties selected for their performance, form and reliability. So within these pages you will find many long-established favourites, as well as a wide range of lesser known bulbs to add interest and charm to your garden, patio or balcony. The RHS Award of Garden Merit, with its new logo, helps you to identify top-performing plants, and you can also select those bulbs which are scented or attractive to pollinating insects, such as bees.

Many bulbs will naturalise in your garden, and if left undisturbed, will spread to form attractive carpets of colour, year after year. One you may not have heard of is Ipheion, the Spring Starflower, which comes in a variety of colours (see p. 31), and bursts into flower at the very end of winter, a welcome herald to the new season. It is fragrant, hardy and easy to grow in any soil which is not waterlogged in winter.

We have included several collections designed to highlight the use of complimentary or contrasting colours in your planting schemes. These include a new, very pretty three-toned Allium combination (p. 20), and three new striking collections of Tulips (p. 68).

We at de Jager are very happy to continue our support for several very worthwhile charities, including the Greenfingers Charity, whose nationwide work creating special gardens for children in hospices provides welcome outdoor space for them to enjoy with their families, away from the clinical setting. www.greenfingerscharity.org.uk.

Closer to home, we are delighted to donate bulbs to Hampdens Hedgehogs, a small but energetic community initiative started by a young girl named Kitty, which helps to raise awareness of the challenges facing Britain's hedgehog population, and encourages practical action through local planting days and habitat creation.

For those looking to develop their planting more fully, our sister company, Hayloft Plants, offers a wide and complementary selection of shrubs, perennials and bedding plants, including many award-winning varieties suited to a range of conditions and garden styles.

With spring in mind, this year the catalogue cover features a beautiful painting of crocuses by the botanical artist, Shona Winter (Dip.SBA .Dist.)

As ever, we continue to engage with our customers online, and welcome your beautiful photographs as well as any enquiries you may have. Please do not hesitate to get in touch (see below). Here at de Jager we aim to offer not only a wealth of choice, but also to ensure that you receive quality bulbs which will flourish in your garden, and I trust that in this catalogue you will find everything you need to help make this coming spring a joyful and inspiring time.

My warmest wishes,

George Clowes

COLLECTIONS FOR OUTDOOR POTS AND TUBS

Plant each variety in individual pots or, for a longer flowering time, plant different varieties of bulbs in layers as illustrated above. Plant bulbs 3 cm apart, larger bulbs at the bottom of the container with the smallest bulbs at the top, leaving 5 cm of soil between each layer. Space the bulbs alternately on each layer so they are not directly on top of one another. Varieties may vary slightly from the illustration but colours will not change.

BULBS FOR INDOOR FORCING

FORCING BULBS The bulbs on the next two pages are ideal for indoor planting. Once planted the pots need to be put in a cool, dark place, keeping the soil moist. Forcing will take between 12 and 16 weeks or when the shoots are 5 cm to 8 cm high. At this stage the pots should be brought out of cold storage into a cool unheated room. Turn the pots daily in order to keep the stems straight and strong. When the foliage and buds are well developed move the pots to a bright sunny position. This 2nd stage takes between 3 to 4 weeks.

CROCUS - LARGE-FLOWERING VARIETIES

The large Dutch varieties are best for forcing. Pickwick and Remembrance are all time favourites but all varieties on page 9 can be forced. Pot as above approximately 3 cm below the soil. These bulbs require about 12 weeks in cold storage.

C2243	Pickwick	Silvery-white with deep and pale lilac stripes and a purple base. FT: February-March. FH: 15 cm. BS: 9/10 cm.	Per 10 10.60	Per 30 30.20
C2245	Remembrance	Producing an abundance of large amethyst-violet flowers, with a silvery gloss. Very long-lasting. FT: February-March. FH: 15 cm. BS: 9/10 cm.	Per 10 10.60	Per 30 30.20

MUSCARI (Grape Hyacinth)

Follow planting instructions at the top of this page. Plant 10 bulbs 2.5 cm deep in a 15 cm pot.

M5726	Armeniacum Marleen	Very large deep cobalt-blue flowers with a strong perfume, excellent for naturalising. FT: April-May. FH: 10-20 cm. BS: 9/+ cm.	Per 10 4.55	Per 30 12.95	 NEW

MULTIFLOWERING HYACINTHS

Multiflora Hyacinth bulbs are propagated so as to produce clusters of delightfully fragrant small flowers. Each bulb will produce several slender stems on which the delicate bells are loosely set. They can be potted as above and are also ideal for naturalising in the garden.

H2800	Multiflowering Blue	Multiflowering blue. BS: Top Size.	Per 1 7.15	Per 3 20.40	
H2801	Multiflowering Pink	Multiflowering pink. BS: Top Size.	Per 1 7.15	Per 3 20.40

H2803	Multiflowering Mixed	1 x each of the above varieties. BS: Top Size.	Per 3 18.55	Per 9 52.85	

PREPARED CHRISTMAS HYACINTHS

These hyacinths are specially prepared for early forcing and for bowl and pot culture. When potting leave the tip of the bulb above soil level. Hyacinths need approximately 10 to 12 weeks in cold storage. They can also be forced in water sitting the bulb above water level so that the base of the bulb just touches the water, then place in the dark until the shoots are 5 cm to 8 cm high. Despatched from early September onwards when they are fully ready.

NEW

When considering lilies in your garden, the first and most important factor to bear in mind is that they must have good drainage. Soil which remains waterlogged after rain is not suitable and will almost certainly mean an early death for any lily planted in it.

THE LURE OF THE LITTLE

Most gardeners are familiar with the more common small bulbs such as Croci, Snowdrops, Muscari and Scillas. But there are many other delightful small-flowering bulbs which are overlooked: we suggest miniature Narcissi, Species Tulips, Chionodoxa, Eranthis, Fritillaria Meleagris and Iris Reticulata.

MIXTURES OF DAFFODILS AND NARCISSI

Varieties used in the following mixtures may vary from those pictured, but colour schemes will be the same.

N0785	Botanical Mix	A well-balanced mixture of yellow, and yellow and white miniature varieties. Ideal for the rockery or the front of flower borders. FT: March-April. FH: 15 cm. BS: 8-12/+ cm.	Per 25 21.80	Per 75 62.15
N0771	Double Daffodil Super Mixture	This excellent well-balanced mixture will appeal to all, specially made up by ourselves from distinct varieties. Ideal for naturalising and flower arrangements. FT: March-April. FH: 15-45 cm. BS: 12/16 cm.	Per 25 21.80	Per 75 62.15
N0772	Flower Border Mixture	This mixture is specially made up by us from named varieties and is greatly superior to the cheap mixtures frequently sold. Every bulb has been carefully chosen to give interesting variations in height and form over a long flowering period. It is therefore particularly suitable for planting in large clumps in your shrubbery or herbaceous borders where the bulbs can be left for many years. FT: March-April. FH: 40-45 cm. BS: 12/16 cm.	Per 25 21.80	Per 75 62.15
N0777	Miniature Narcissus Mixture	The Narcissi in this mixture may be small but they will provide a long season of wonderful blooms. FT: March-April. FH: 25-30 cm. BS: 10/14 cm.	Per 25 21.80	Per 75 62.15
N0780	Pink & White Daffodil & Narcissi Mixture	A stunning mix of varieties with ivory to white petals and pink, salmon or apricot cups. FT: March-April. FH: 35-45 cm. BS: 10/14 cm.	Per 25 21.80	Per 75 62.15
N0774	Tazetta Multi-Flowering Super Mixture	This delightful mixture will appeal to all, specially created by ourselves from distinct varieties, many of which are deliciously fragrant. FT: March-April. FH: 30-42 cm. BS: 12/16 cm.	Per 25 21.80	Per 75 62.15
	N0781	Tazetta Yellow & White Cheerfulness Mixture An even mixture of yellow and white Cheerfulness. FT: April. FH: 40 cm. BS: 14/16 cm.	Per 25 21.80	Per 75 62.15
	N0782	Triandrus Narcissi Thalia & Sunlight Sensation Mixture A balanced mix of the Thalia and Sunlight Sensation. FT: April. FH: 30 cm. BS: 12/16 cm.	Per 25 21.80	Per 75 62.15

RARE AND FINE TULIP SPECIES

Tulips will thrive in any type of well-drained soil and locality, but after they have flowered be sure to remove any decaying petals or foliage from the soil. For best results plant late September-October onwards, when temperatures drop.
All our quality tulips are Top Size.

P. de Jager & Sons Limited have been selling top quality, top size bulbs for over 158 years. We cannot overemphasise the importance of size. Top size bulbs really do make a huge difference both in terms of flowering and naturalisation.

Smaller size bulbs will be less expensive but the results will be very noticeably inferior.

In order to illustrate the contrast in size, we have photographed a de Jager Amaryllis bulb beside one purchased from a garden centre. You can see the difference! All de Jager top bulb sizes are published in our catalogues.

Flower Bulb Care

Unpack bulbs on arrival, or at least separate the bags and open them.
It is essential to have fresh air circulating between opened boxes and bags.
Remember: fresh air, circulation, even temperatures, are the key factors to good results.

PICTORIAL MEADOWS MIXTURES

These Meadow Mixtures are carefully blended seed mixes of native and non-native hardy species, designed to provide high quality flowering displays. They have been developed following several years of intensive trials at the University of Sheffield. Unlike other mixes that are available, they will flower and provide visual interest over an extremely long period of time (from summer through to late autumn) and are formulated to produce a succession of flowering species.

They inject drama into large-scale commercial landscapes and create sparkling, complex and intricate pictures in the very smallest of spaces. They provide a colourful, wildlife-friendly replacement for mown grass; they can be sown formally in beds or to provide colour between shrubs, trees and perennials. Leeds City Council included a meadow mixture in their magnificent Gold Medal winning garden at the Chelsea Flower Show in 2010, and these mixtures have been used extensively in the Olympic Park.

Sow the Annual seed mixes at a rate of 2-3g per square metre in the spring - March, April or May - and they will produce superb colour displays within 8 weeks or so of sowing. The Perennial seed mixes all contain over 20 species of plants, and should be sown at a rate of 2g per square metre (except Purple Haze – 3g per sq. m.) from early autumn to late spring, with October/November being the best for medium to large scale plantings. Once established the meadow can be managed simply with an annual cut in late February.

SD111	Classic Annual Mix	The original Pictorial Meadows mix is illustrated in the main picture opposite (taken at The Eden Project) and produces stunning displays right through until late October/November. Starting out with white, blues, pinks and reds, the tapestry turns to reds, orange and yellow in the autumn. The mix has been carefully balanced for colour and succession of flowering, and components include: Shirley Poppy, Californian Poppy, Cornflower, Fairy Toadflax, Tickseed, Red Orache and Larkspur. FH: up to 1m.	Per 20g 20.00	Per 50g 32.00
SD141	Cornfield Annual Mix	A carefully selected mix of pretty cornfield annuals that will flower mainly in July and August, including: Field Poppy, Cornflower, Scentless Mayweed and Corncockle. FH: up to 1m.	Per 20g 20.00	Per 50g 32.00
SD161	Pixie Annual Mix	A mix suited especially to more restricted or compact situations, but having the same long-flowering characteristics of the standard mixture; components include: Fairy Toadflax, Red Flax, Shirley Poppy, Love-in-amist, Candytuft and Blue Flax. FH: up to 50 cm.	Per 20g 20.00	Per 50g 32.00
SD181	Aqua Annual Mix	Restful and harmonious, this mix contains flowering meadow species of cool blues, whites, mauves and purple. Over a long season, the display includes: Salvia Annual Sage, Desert Bluebell, Cornflower, Echium Blue Bedder and Baby Blue Eyes.	Per 20g 20.00	Per 50g 32.00
SD251	Persian Carpet Perennial Mix	A flowering meadow with a very long season, and complex and subtle colour combinations throughout the year. Also perfect for narrow borders and edges. Includes: Carthusian Pink, Dianthus carthusianorum, Hard Fescue, Festuca longifolia, Maltese Cross, Lychnis chalcedonica, Vipers Bugloss and Echium vulgare.	Per 20g 52.00	Per 50g 97.00
SD211	Tuscan Hills Perennial Mix	A warm, vibrant mixture for normal fertility soils. Mostly yellows and golds with white, hints of orange and flashes of later purples, our most popular perennial mix performs best in free-draining, sunny spots. Includes: Blackeyed Susan, Rudbeckia hirta, Sea Holly, Eryngium planum, Yarrow, Achillea millefolium, Yellow Ox Eye, Bupthalmum salicifolium.	Per 20g 52.00	Per 50g 97.00
SD221	Moody Blues Perennial Mix	A beautiful, cool, elegant combination for normal fertility soils, this mix will perform quite happily in semi-shade. Predominantly mauve and blue with billows of white and flashes of purple. Includes: Michaelmas Daisy, Greater Knapweed, Field Scabious, Wild Carrot, Perennial Flax, Purple Coneflower, Ox-eye Daisy and Columbine. FH: up to 50 cm.	Per 20g 52.00	Per 50g 97.00
SD231	Turkish Delight Perennial Mix	A gorgeous, robust and very richly coloured carpet designed for a long flowering season on normal fertility soils. Includes: Field Scabious, Knautia arvensis, Great Burnet, Sanguisorba officinalis, Meadow Cranesbill and Geranium Pratense.	Per 20g 52.00	Per 50g 97.00

FREQUENTLY ASKED QUESTIONS

Q. Is there any grass seed content?

A. There is no grass content to the mixes. Don't mix with grass as it will kill off the flowers.

Q. Can I just scatter the flowers over existing grass to create a meadow effect?

A. Unfortunately not - the seeds have to be sown on bare soil.

Q. Will the annual mixes self-seed?

A. Only some of the species in the annual mixes will. To get the same effect you have to resow each year.

Q. Will birds eat the seed?

A. No, they are too small for them to notice.

Q. Will the mixes work in Sandy/Chalky/Clay soil?

A. Yes. They will work on all types of soil, but for these mixes, the better the soil the better the result.

Q. Do I need to water the seeds if it doesn't rain once I've sown them?

A. For annuals no there is usually enough rain eventually and if you over-water they could rot before they germinate. However, if there is prolonged drought after you have sown then you could try watering once a week. Perennials are more demanding and we recommend irrigation in Spring.

Q. Will the mixes work in shady areas?

A. Yes, but the mixes do need sunshine at some point during the day.

Q. Can I combine the annual and perennial seed mixes?

A. We don't recommend this, as each seed mix is carefully formulated to produce a specific result.

Q. How long will the seed keep if I don't use it all?

A. Usually for several years - keep stored in a cool dry place.

PLANTING DEPTH

Failures with bulbs are most frequently due to their having been planted too deep or too shallow. A good general rule to follow is to cover the bulb with soil one and a half to twice its own depth, measuring the bulb from the base to the shoulder. Thus a bulb measuring 2 inches from the base to the shoulder should be covered with 3-4 inches of soil. Always unpack bulbs on arrival and leave bags open so air can circulate until planting.
