**COLLECTIONS FOR OUTDOOR POTS AND TUBS**

Plant each variety in individual pots or, for a longer flowering time, plant different varieties of bulbs in layers as illustrated above. Plant bulbs 1½ inches apart, larger bulbs at the bottom of the planting with the smallest bulbs at the top, leaving 2 inches of soil between each layer. Space the bulbs alternately on each layer so they are not directly on top of one another. Varieties may vary slightly from the illustration but colours will not change.

## BULBS FOR INDOOR FORCING

**FORCING BULBS** The bulbs on the next two pages are ideal for indoor planting. Once planted the pots need to be put in a cool, dark place, keeping the soil moist. Forcing will take between 12 and 16 weeks or when the shoots are 2" to 3" high. At this stage the pots should be brought out of cold storage into a cool unheated room. Turn the pots daily in order to keep the stems straight and strong. When the foliage and buds are well developed move the pots to a bright sunny position. This 2nd stage takes between 3 to 4 weeks.

## CROCUS - LARGE-FLOWERING VARIETIES

The large Dutch varieties are best for forcing. Pickwick and Remembrance are all time favourites but all varieties on page 9 can be forced. Pot as above approximately 1" below the soil. These bulbs require about 12 weeks in cold storage.

<b>C2243</b>	<b>Pickwick</b>	Silvery-white with deep and pale lilac stripes and a purple base. FT: February-March. FH: 15 cm (6"). BS: 9/10 cm.	<b>Per 10</b> 11.00	<b>Per 30</b> 31.40

## MULTIFLOWERING HYACINTHS

Multiflora Hyacinth bulbs are propagated so as to produce clusters of delightfully fragrant small flowers. Each bulb will produce several slender stems on which the delicate bells are loosely set. They can be potted as above and are also ideal for naturalising in the garden.

## PREPARED CHRISTMAS HYACINTHS

These hyacinths are specially prepared for early forcing and for bowl and pot culture. When potting leave the tip of the bulb above soil level. Hyacinths need approximately 10 to 12 weeks in cold storage. They can also be forced in water sitting the bulb above water level so that the base of the bulb just touches the water, then place in the dark until the shoots are 2" to 3" high. Despatched from early September onwards when they are fully ready.

When considering lilies in your garden, the first and most important factor to bear in mind is that they must have good drainage. Soil which remains waterlogged after rain is not suitable and will almost certainly mean an early death for any lily planted in it.

## THE LURE OF THE LITTLE

Most gardeners are familiar with the more common small bulbs such as Croci, Snowdrops, Muscari and Scillas. But there are many other delightful small-flowering bulbs which are overlooked: we suggest miniature Narcissi, Species Tulips, Chionodoxa, Eranthis, Fritillaria Meleagris and Iris Reticulata.

**MIXTURES OF DAFFODILS AND NARCISSI**

Varieties used in the following mixtures may vary from those pictured, but colour schemes will be the same.

<b>N0785</b>	<b>Botanical Mix</b>	A well-balanced mixture of yellow, and yellow and white miniature varieties. Ideal for the rockery or the front of flower borders. FT: March-April. FH: 15 cm (6"). BS: 8-12/+ cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
<b>N0771</b>	<b>Double Daffodil Super Mixture</b>	This excellent well-balanced mixture will appeal to all, specially made up by ourselves from distinct varieties. Ideal for naturalising and flower arrangements. FT: March-April. FH: 15-45 cm (6-18"). BS: 12/16 cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
<b>N0772</b>	<b>Flower Border Mixture</b>	This mixture is specially made up by us from named varieties and is greatly superior to the cheap mixtures frequently sold. Every bulb has been carefully chosen to give interesting variations in height and form over a long flowering period. It is therefore particularly suitable for planting in large clumps in your shrubbery or herbaceous borders where the bulbs can be left for many years. FT: March-April. FH: 40-45 cm (16-18"). BS: 12/16 cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
<b>N0777</b>	<b>Miniature Narcissus Mixture</b>	The Narcissi in this mixture may be small but they will provide a long season of wonderful blooms. FT: March-April. FH: 25-30 cm (10-12"). BS: 10/14 cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
<b>N0780</b>	<b>Pink &amp; White Daffodil &amp; Narcissi Mixture</b>	A stunning mix of varieties with ivory to white petals and pink, salmon or apricot cups. FT: March-April. FH: 35-45 cm (12-18"). BS: 10/14 cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
<b>N0774</b>	<b>Tazetta Multi-Flowering Super Mixture</b>	This delightful mixture will appeal to all, specially created by ourselves from distinct varieties, many of which are deliciously fragrant. FT: March-April. FH: 30-42 cm (12-16"). BS: 12/16 cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
 <b>N0781</b>	<b>Tazetta Yellow &amp; White Cheerfulness Mixture</b>	An even mixture of yellow and white Cheerfulness. FT: April. FH: 40 cm (16"). BS: 14/16 cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
 <b>N0782</b>	<b>Triandrus Narcissi Thalia &amp; Sunlight Sensation Mixture</b>	A balanced mix of the Thalia and Sunlight Sensation. FT: April. FH: 30 cm (12"). BS: 12/16 cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
<b>N0778</b>	<b>Trumpet Daffodil Mixture</b>	A spectacular mixture of the finest trumpet daffodils including yellows, whites and bicolours. FT: March-April. FH: 35-45 cm (14-18"). BS: 12/16 cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
<b>N0779</b>	<b>Yellow &amp; White Trumpet Daffodil Mixture</b>	This mixture includes Yellow and White Trumpets in proper proportions selected to provide a stunning display over a long period. FT: March-April. FH: 35-45 cm (14-18"). BS: 12/16 cm.	<b>Per 25</b> 20.50	<b>Per 75</b> 58.40
<b>N0775</b>	<b>10 kg (approx. 140-160 bulbs)</b>	A well-balanced mixture superior to mixtures usually sold elsewhere. A mix of all types of Daffodils and Narcissi for naturalising. The bulbs offered as lifted, which means they are not graded but are all of flowering size. FT: March-April. FH: 30-45 cm (12-18"). BS: 10/12 cm up to 14/16 cm as lifted.	<b>10kg</b> 42.05	
<b>N0776</b>	<b>25 kg (approx. 350-400 bulbs)</b>	A well-balanced mixture superior to mixtures usually sold elsewhere. A mix of all types of Daffodils and Narcissi for naturalising. P. de Jager & Sons Limited have been selling top quality, top size bulbs for over 154 years. We cannot overemphasise the importance of size. Top size bulbs really do make a huge difference both in terms of flowering and naturalisation.

Smaller size bulbs will be less expensive but the results will be very noticeably inferior.

In order to illustrate the contrast in size, we have photographed a de Jager Amaryllis bulb beside one purchased from a garden centre. You can see the difference! All de Jager top bulb sizes are published in our catalogues.

### Flower Bulb Care

Unpack bulbs on arrival, or at least separate the bags and open them.  
It is essential to have fresh air circulating between opened boxes and bags.  
Remember: fresh air, circulation, even temperatures, are the key factors to good results.

## PICTORIAL MEADOWS MIXTURES

These Meadow Mixtures are carefully blended seed mixes of native and non-native hardy species, designed to provide high quality flowering displays. They have been developed following several years of intensive trials at the University of Sheffield. Unlike other mixes that are available, they will flower and provide visual interest over an extremely long period of time (from summer through to late autumn) and are formulated to produce a succession of flowering species.

They inject drama into large-scale commercial landscapes and create sparkling, complex and intricate pictures in the very smallest of spaces. They provide a colourful, wildlife-friendly replacement for mown grass; they can be sown formally in beds or to provide colour between shrubs, trees and perennials. Leeds City Council included a meadow mixture in their magnificent Gold Medal winning garden at the Chelsea Flower Show in 2010, and these mixtures have been used extensively in the Olympic Park.

Sow the Annual seed mixes at a rate of 2-3g per square metre in the spring - March, April or May - and they will produce superb colour displays within 8 weeks or so of sowing. The Perennial seed mixes all contain over 20 species of plants, and should be sown at a rate of 2g per square metre (except Purple Haze - 3g per sq. m.) from early autumn to late spring, with October/November being the best for medium to large scale plantings. Once established the meadow can be managed simply with an annual cut in late February.

	<b>SD111</b>	<b>Classic Annual Mix</b>	The original Pictorial Meadows mix is illustrated in the main picture opposite (taken at The Eden Project) and produces stunning displays right through until late October/November. Starting out with white, blues, pinks and reds, the tapestry turns to reds, orange and yellow in the autumn. The mix has been carefully balanced for colour and succession of flowering, and components include: Shirley Poppy, Californian Poppy, Cornflower, Fairy Toadflax, Tickseed, Red Orache and Larkspur. FH: up to 1m (39").	Per 20g 19.00	Per 50g 30.00
	<b>SD141</b>	<b>Cornfield Annual Mix</b>	A carefully selected mix of pretty cornfield annuals that will flower mainly in July and August, including: Field Poppy, Cornflower, Scentless Mayweed and Corncockle. FH: up to 1m (39").	Per 20g 19.00	Per 50g 30.00
	<b>SD161</b>	<b>Pixie Annual Mix</b>	A mix suited especially to more restricted or compact situations, but having the same long-flowering characteristics of the standard mixture; components include: Fairy Toadflax, Red Flax, Shirley Poppy, Love-in-amist, Candytuft and Blue Flax. FH: up to 50 cm (20").	Per 20g 19.00	Per 50g 30.00
	<b>SD261</b>	<b>Cottage Garden Perennial Mix</b>	A tall, dramatic, colourful, and long season meadow. It was initially designed to be sown over pure brick rubble on housing demolition sites, but finds itself equally at home in garden soils. This meadow offers fantastic variety and is jam-packed full of species that work wonderfully together, providing drama and colour from early Spring, right through to late Autumn. On very low fertility soils, an annual cut and collect is not always necessary.	Per 20g 49.50	Per 50g 92.50
	<b>SD251</b>	<b>Persian Carpet Perennial Mix</b>	A flowering meadow with a very long season, and complex and subtle colour combinations throughout the year. Also perfect for narrow borders and edges. Includes: Carthusian Pink, Dianthus carthusianorum, Hard Fescue, Festuca longifolia, Maltese Cross, Lychnis chalcidonica, Vipers Bugloss and Echium vulgare.	Per 20g 49.50	Per 50g 92.50
	<b>SD211</b>	<b>Tuscan Hills Perennial Mix</b>	A warm, vibrant mixture for normal fertility soils. Mostly yellows and golds with white, hints of orange and flashes of later purples, our most popular perennial mix performs best in free-draining, sunny spots. Includes: Blackeyed Susan, Rudbeckia hirta, Sea Holly, Eryngium planum, Yarrow, Achillea millefolium, Yellow Ox Eye, Bupththalmum salicifolium.	Per 20g 49.50	Per 50g 92.50
	<b>SD221</b>	<b>Moody Blues Perennial Mix</b>	A beautiful, cool, elegant combination for normal fertility soils, this mix will perform quite happily in semi-shade. Predominantly mauve and blue with billows of white and flashes of purple. Includes: Michaelmas Daisy, Greater Knapweed, Field Scabious, Wild Carrot, Perennial Flax, Purple Coneflower, Ox-eye Daisy and Columbine. FH: up to 50 cm (20").	Per 20g 49.50	Per 50g 92.50
	<b>SD231</b>	<b>Turkish Delight Perennial Mix</b>	A gorgeous, robust and very richly coloured carpet designed for a long flowering season on normal fertility soils. Includes: Field Scabious, Knautia arvensis, Great Burnet, Sanguisorba officinalis, Meadow Cranesbill and Geranium Pratense.	Per 20g 49.50	Per 50g 92.50

## FREQUENTLY ASKED QUESTIONS

**Q. Is there any grass seed content?**

A. There is no grass content to the mixes. Don't mix with grass as it will kill off the flowers.

**Q. Can I just scatter the flowers over existing grass to create a meadow effect?**

A. Unfortunately not - the seeds have to be sown on bare soil.

**Q. Will the annual mixes self-seed?**

A. Only some of the species in the annual mixes will. To get the same effect you have to resow each year.

**Q. Will birds eat the seed?**

A. No, they are too small for them to notice.

**Q. Will the mixes work in Sandy/Chalky/Clay soil?**

A. Yes. They will work on all types of soil, but for these mixes, the better the soil the better the result.

**Q. Do I need to water the seeds if it doesn't rain once I've sown them?**

A. For annuals no there is usually enough rain eventually and if you over-water they could rot before they germinate. However, if there is prolonged drought after you have sown then you could try watering once a week. Perennials are more demanding and we recommend irrigation in Spring.

**Q. Will the mixes work in shady areas?**

A. Yes, but the mixes do need sunshine at some point during the day.

**Q. Can I combine the annual and perennial seed mixes?**

A. We don't recommend this, as each seed mix is carefully formulated to produce a specific result.

**Q. How long will the seed keep if I don't use it all?**

A. Usually for several years - keep stored in a cool dry place.

## PLANTING DEPTH

Failures with bulbs are most frequently due to their having been planted too deep or too shallow. A good general rule to follow is to cover the bulb with soil one and a half to twice its own depth, measuring the bulb from the base to the shoulder. Thus a bulb measuring 2 inches from the base to the shoulder should be covered with 3-4 inches of soil. Always unpack bulbs on arrival and leave bags open so air can circulate until planting.
